

## **Tired of scuffs, gouges, and stains? Stop the abuse with PVC sheet.**

### **There's a new kid in town.**

When it comes to custom PVC sheet, you already know the big players. Maybe it's time to meet the new kid on the block—**Pawling**.

Processing PVC sheet is challenging if you're new to it. But we're *not* new. We've been extruding PVC for more than 30 years, so we know PVC.

What is new is our **PRO TEK<sup>®</sup> acrylic/PVC alloy sheet**, a high-quality alternative to the big names. We offer the same standards of impact resistance you're used to, plus prices and turnaround times you might find refreshing.

### **Consider the possibilities.**

The beauty of custom PVC sheet is how you can use it. With more than 50 standard colors and thicknesses from .25" to .125", PRO TEK can be used in thousands of applications—especially on surfaces that take abuse.

### **Protect your walls with PRO TEK.**

PRO TEK can be laminated to wood, metal, gypsum, and other flat or curved surfaces. It resists staining, chipping, and gouging, making it the perfect choice for high-use areas such as:

- Partitions, doors, and panels
- Exhibits and displays
- Store fixtures and case goods
- Wood and steel furniture

### **Try thermoforming for large parts.**

Thermoforming is a fast production method that costs less than injection molding. It's the ideal choice for:

- Consumer products
- Commercial and institutional furniture
- Equipment housing, shrouds, and enclosures
- Trays and storage compartments
- Interior components of vehicles

### **Fabricate PRO TEK for other uses.**

PVC sheet is not just for walls. You can join fabricated PRO TEK to surfaces using adhesives, screws or rivets, without cracking or chipping. Think about using PRO TEK for:

- Corner guards, crash rails, and kick plates
- Brackets and supports
- Equipment guards
- Container linings

### **Why choose Pawling?**

At Pawling, we believe competition is a good thing. It keeps quality up and prices down. With more than 30 years in the custom extrusion business, we've learned what it takes to gain and keep your business.

- **We're flexible.** Tell us what you need and we'll make it happen. Ask about our custom colors.
- **We're smaller and more responsive.** No big bureaucracy here. We operate like a family, and treat you like family too.

- **We give you better lead times.** Depending on your job, we can ship two or three weeks after you place your order.
- **We'll probably cost you less.** Call us for a quote. You might be in for a pleasant surprise.

Bottom line?

We're the little guy. We have to try harder.
